StudySmart AI: Three User Personas

These three personas represent different students who could use StudySmart AI to organize homework, prepare for tests, and understand difficult subjects.

Persona 1: The Busy High School Student

Name: Alex

Age: 16

Occupation: High school student

Goals: Finish homework on time, earn good grades, and prepare for tests.

Challenges: Has several assignments due at once and struggles to manage time.

How StudySmart AI would help: The app would organize assignments, create a study schedule, and explain difficult homework questions.

Quote: “I have so much homework that I don't even know where to start!”

Persona 2: The Student Who Struggles with Difficult Subjects

Name: Jordan

Age: 15

Occupation: High school student

Goals: Better understand school subjects and feel more prepared for exams.

Challenges: Sometimes has trouble understanding lessons in class and feels unsure about asking for help.

How StudySmart AI would help: The AI Homework Helper would explain difficult topics in simple language, while practice quizzes would help Jordan check understanding.

Quote: “I understand things better when someone explains them step by step”

Persona 3: The Student Who Wants to Study Smarter

Name: Taylor

Age: 17

Occupation: High school student

Goals: Prepare for exams efficiently, remember important information, and balance school with personal activities.

Challenges: Forgets information after studying and spends too much time reviewing notes without knowing what to focus on.

How StudySmart AI would help: The app would create digital flashcards, generate practice quizzes, and help Taylor plan study sessions before exams.

Quote: “I want to spend less time studying and remember more of what I learn.”
